

Mohammad Hamdy

Backend Developer | Software Engineer

Columbus, OH | mohammadhamdy95@live.com | GitHub: [MohammadHamdy95](https://github.com/MohammadHamdy95) | LinkedIn: [mohamdy95](https://www.linkedin.com/in/mohamdy95)

TECHNICAL SKILLS

Backend: Java, AWS ECS, AWS Lambda, AWS API Gateway, AWS S3, AWS IAM, AWS CloudFormation, DynamoDB, Dagger, OpenAPI, SQL, Git CLI, GitHub, Spring Boot

Frontend: Axios, JavaScript, HTML, CSS, AngularJS

Additional Skills: Agile Project Management, Algorithms, Architecture, Debugging, Deployment, SDLC, PostgreSQL, Terraform

EXPERIENCE

JPMorgan Chase, *Columbus WA - Software Development Engineer II*

June 2026 - present

- Created infrastructure and CI/CD pipelines for APIs to securely and safely allow 10 million banking customers to share banking information with 3rd parties.

Amazon, *Bellevue WA - Software Development Engineer*

Aug 2022 - Jan 2026

- Reduced latency by 15% across customer shipping label rate shopping APIs used in the US, EU, and JP - handling over 70M requests per month generating an additional \$5MM in revenue.
- Increased Amazon's BuyShipping customer adoption by 5% introducing backend infrastructure for giving insurance on select shipping labels, generating \$2MM in annual revenue.
- Built and maintained CI/CD pipelines with integration tests, reducing manual workload by 50 hours per month for the SDE team.
- Led a large-scale migration of a service handling 80M monthly requests, utilizing shadow mode to ensure zero regression and seamless cutover to the new system and saving \$1MM in annual upkeep costs.

PROJECTS

Automated Islamic Prayer Time System, *Backend Developer* - Javan, Spring Boot, Linux | [GitHub](#)

- Built a platform that computed how many times loops a number would take to get to Kaprekar's Number
- Designed email notification system using Jakarta Mail API with SMTP authentication, automatically sending daily prayer schedules with formatted timings to users via Gmail integration
- Integrated audio playback functionality for headless Linux systems, supporting different audio files for Fajr (dawn) prayer and standard Adhan calls, with automatic system environment configuration
- Implemented timezone-aware date handling using Joda Time library for accurate prayer time calculations across different geographic locations and time zones

Full-Stack Customer Management Platform, *Backend Developer* - Java, Spring Boot, Angular, AWS | AWS Lambda

- Built a comprehensive enterprise platform managing user workflows, device automation, and real-time monitoring with cloud-native architecture and modern web technologies
- Designed and implemented custom Java library with automated Spring configuration published to GitHub Packages, featuring facade patterns for seamless integration with multiple external APIs and services including Discord, email systems, and third-party platforms
- Created scalable cloud-native architecture integrating AWS services including DynamoDB for data persistence, S3 for file storage, and SNS for notifications, with comprehensive caching strategies and performance optimization
- Developed advanced Angular frontend using standalone components, signals for reactive state management, and Tailwind CSS for modern responsive UI design with real-time dashboard monitoring and elegant animations

- Built comprehensive testing strategy using JUnit 5, Mockito, and Jasmine with Karma across both backend and frontend components, ensuring code quality and reliability with structured logging and health monitoring

Fruit Shop Website, Backend Developer - AWS Lambda | Open API | AWS Amplify | AngularJS | [GitHub](#)

- Built website that allows users to purchase products with configured shopping cart and checkout methods
- Created user authentication with AWS Amplify and email verification components
- Implemented methods using DynamoDB to facilitate CRUD functionality with the database
- Developed navigation bar feature using AngularJS and to improve user experience

EDUCATION

CSU Monterey Bay, *Bachelor of Science in Computer Science*

Jan 2026 - June 2027

BloomTech Institute of Technology, *Graduate Full Time Program, Backend Development*

Sept 2021 - June 2022

Imperial Valley College, *Allied Health, GPA: 3.7*

Jan 2019 - Nov 2021
